

The 1951 M.P. Moller Pipe Organ, Opus #8259, at Wesley United Methodist Church, Ironwood, MI

The wind-blown pipes of the organ are located in two chambers on either side of the Chancel area. The chamber on the North side contains the pipes of the Swell keyboard division and the 16' Subbass of the Pedal division. The chamber on the South side contains the pipes of the Great and Choir divisions, along with the 8' Octave of the Pedal division. The console of the organ is located at the far right of the Chancel space, in back of the Choir pews. The organ blower and 10 volt DC generator are located in the basement boiler room. With the exception of the replacement of the static wind reservoir in the boiler room, all of the components of the organ are original. No mechanical or tonal alterations have been made. All of the pipes are of metal except the ones noted. The manual windchests are 73 note chests. Moller Opus #8259 has 23 individual sets (ranks) of pipes with a total of 1,256 individual organ pipes.
